ZHA-280 A

CLASS N
HORIZONTAL CYLINDRICAL
PRESSURE STEAM STERILIZER

Class N Horizontal Cylindrical Pressure Steam Sterilizer

Class N Horizontal Cylindrical Pressure Steam Sterilizer is equipped with a stainless steel chamber. It comes with a door safety lock system. The safety valve will open automatically when the inner pressure is over 0.24MPa, and the steam will exhaust to the water tank. With automatic sterilization, it is easy to operate, safe and reliable.

Safe protection of water leaking

Door safety lock system. Pressure in the chamber must be less than 0.027MPa for the door to be opened.

Over temperature and over pressure auto-protection

Will auto discharge the cool air, and discharge steam automatically after sterilization

Drying function.

Automatically shuts off the water and alarm when the machine is having less water.

Model

ZHA-280 A

Volume (L)	280 (φ600×1000mm)
Power	12KW/380V 50Hz
Overall Dimension (mm)	1400×770×1780
Working Pressure	0.22MPa
Working Temperature (°C)	134
Adjustment of Temperature	105~134°C
Heat Average	±2°C
Time of Drying	0-60 min
Time of Sterilization	0-60 min
